Saturday, March 25, 2017 – 10:00 A.M.

MINNESOTA NEUROPATHY ASSOCIATION
2nd Program of our 21st Anniversary Series

Medical Cannabis – what’s it all about?

Our speakers on March 25 are Dr. Gary Starr, one of the co-founders of the cannabis manufacturer LeafLine Labs, and our Board member, Mary McLeod. Both will talk about the use of cannabis in addressing neuropathic pain.

Mary has used it as a peripheral neuropathy patient, and will tell us of the process involved in applying for the state cannabis registry, and her experience as a consumer.

Dr. Starr will address the origins of the medical cannabis industry in Minnesota, the research involved in setting up their labs, and their reasons for going into this business. He will also review the variety of pain and other medical problems with which they have worked, the general results these trials have shown, their specific experiences with neuropathic patients, and where they expect to go from here.

We will meet at: 10:00 A.M. – Saturday, March 25th

St. Michael’s Lutheran Church
9201 Normandale Boulevard, Bloomington, MN 55437
